# 1. INTRODUCTION

## 1.1. Background

- A visitor exit survey is a tool used by travel destinations to measure the impact of its visitors and to profile visitors to the destination.
- An exit survey can capture demographic and trip characteristics such as the ages of visitors, travel party size and composition, purpose of trip, regions visited and length of stay, type of accommodation used, activities participated in, expenditures, and trip evaluation.
- Prince Edward Island (PEI) has been conducting exit surveys for many years. The last PEI visitor exit survey was conducted in 2012. In that year, data was captured for a one-year period from January 5, 2012 to January 7, 2013.
- The 2014 PEI visitor exit survey was also conducted for one calendar year. Data collection began on December 31, 2013 and finished on January 7, 2015.
- At the province's three exit points, non-residents were provided with a package containing an introductory letter about the study in English and French, a copy of the questionnaire in both English and French, and a pre-paid, pre-addressed envelope for respondents to use to return the survey.
- The package and the introductory letter included a web address that respondents could use to access the online version of the survey. While the paper questionnaires were available in only English and French, the online survey was available in six languages: English, French, traditional and simplified Chinese, Japanese and German. The package and introductory letter were also printed with a Quick Response (QR) code that individuals could scan to complete the survey on their mobile device.
- More details about the methodology of the 2014 PEI exit survey are provided in the Appendix.

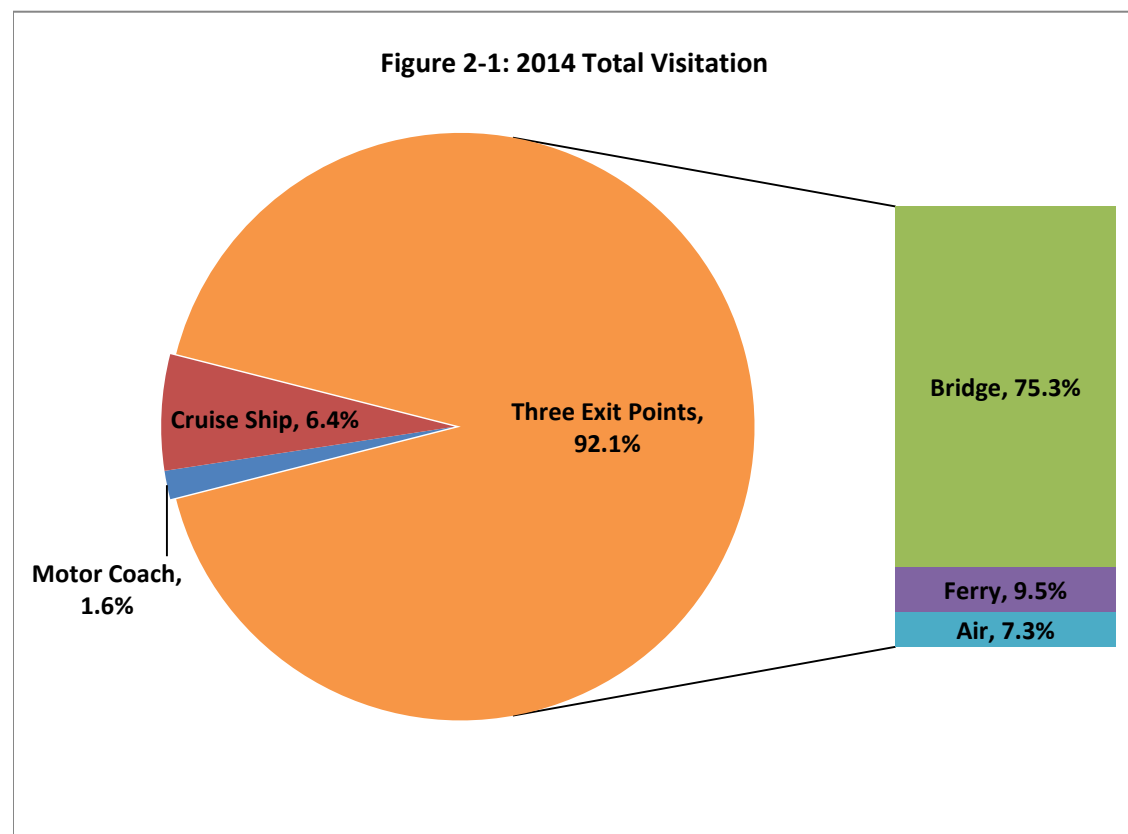

## 1.2. The Study Purpose

- The main purpose of the 2014 PEI visitor exit survey was to provide a full range of statistics on the volume of visitors to Prince Edward Island and detailed characteristics of their trips such as purpose of trip, travel party size and composition, PEI regions visited and length of stay, type of accommodation used, activities participated in, expenditures, evaluation of trip, and demographic information about the visitors.
- The survey also pursued seven broad objectives:
  - To update existing historical information on visitors to PEI.
  - To collect critical data to measure the overall importance of tourism in PEI.
  - To gather information regarding visitor behaviours.
  - To identify key market segments of visitors to PEI.
  - To determine if visitors were aware of the PEI 2014 celebrations and if so, the level of influence the celebrations had on their decision to visit PEI in 2014.
  - To determine the level of participation in the PEI 2014 celebrations and events by visitors.
  - To enhance our knowledge and understanding of tourism (in general, and for PEI).
- **Note that this report includes results for those who stayed at least one night in the North Cape Coastal Drive (NCCD) region in 2014. Since visitors may have stayed in multiple tourism regions, data presented in this report reflects their entire time in PEI and may include spending, activities, etc., that took place in other regions. Although many visitors would have visited NCCD for the day only and not spent the night, those visitors' activities, spending, etc., are not included in this report.**
- This report includes NCCD visitor profiles by *tourism season*.

## **2. TOTAL NON-RESIDENT VISITORS AND TRAVEL PARTIES IN PRINCE EDWARD ISLAND**

- In total, over 1.33 million people visited PEI in 2014. This includes 84,952 cruise ship passengers (6.4% of total visitors) and 20,904 motor coach passengers (1.6% of total visitors).
- The remaining visitors were captured at PEI's three exit points (Confederation Bridge, Woods Islands ferry and Charlottetown Airport). Total visitors exiting PEI via these exit points was 1,226,235 (92.1% of total visitors). Note, this number excludes motor coach passengers who would have exited via the Confederation Bridge or Wood Islands ferry.
- The majority (81.8%) of visitors captured at PEI's three exit points had exited PEI via the Confederation Bridge while 10.3 percent had exited via the Wood Islands ferry and 7.9 percent had left by airplane at the Charlottetown Airport.
- Excluding motor coach and cruise ship passengers, it was estimated that 432,832 travel parties visited PEI in 2014. These parties are the subject of this report.
- About 7 percent of travel parties did not stay overnight in PEI during their trip (30,076 parties) while the remaining 402,756 parties (93.1%) stayed at least one night in PEI.
- Among same-day travel parties, 39.5 percent visited PEI during the main season of July and August, 20.1 percent visited during September or October, and 16.5 percent visited during May or June. About 13 percent visited between January and April, and 11.0 percent visited in November or December.
- Visitation by overnight travel parties followed a similar pattern. About 44 percent of overnight travel parties visited PEI during the main season, 17.8 percent visited in the fall season (September and October), and 15.5 percent visited in the spring season (May and June). About 15 percent visited between January and April, and 8.2 percent visited in November or December.
- About 32 percent of all parties were from each of Nova Scotia and New Brunswick while 12.0 percent were from Ontario and 9.5 percent were from Quebec. Seven percent were from the United States and 2.0 percent were from a country outside of Canada and the United States.

## 2.1. Overview of 2014 Total Visitation

**Table 2-1: Estimated Number of Visitors in 2014**

	Number of Visitors	Percent of Visitors
<b>Visitors by Exit Point</b>	<b>1,226,235</b>	<b>92.1%</b>
Bridge	1,003,377	75.3%
Ferry	125,986	9.5%
Air	96,872	7.3%
<b>Motor Coach Tourists</b>	<b>20,904</b>	<b>1.6%</b>
<b>Cruise Ship Passengers</b>	<b>84,952</b>	<b>6.4%</b>
<b>Total</b>	<b>1,332,091</b>	<b>100.0%</b>

August	19,348	20.0%	80,357	23.5%	266,936	26.6%	13,914	32.4%	44,292	35.2%	330,576	27.0%
September	10,165	10.5%	35,950	10.5%	93,882	9.4%	5,910	13.8%	19,066	15.1%	123,113	10.0%
October	7,966	8.2%	24,203	7.1%	57,920	5.8%	2,861	6.7%	8,005	6.4%	73,891	6.0%
November	4,325	4.5%	14,817	4.3%	31,330	3.1%	1,153	2.7%	2,282	1.8%	37,937	3.1%
December	4,819	5.0%	15,243	4.5%	45,014	4.5%	453	1.1%	947	0.8%	50,780	4.1%
Total	96,872	100.0%	342,188	100.0%	1,003,377	100.0%	42,917	100.0%	125,986	100.0%	1,226,235	100.0%
		(7.9%)				(81.8%)				(10.3%)		(100.0%)

Note: 1) This data includes non-resident, non-commercial traffic and excludes autos towing utility trailers, motorcycles, and buses.

2) For the airport, monthly individual travel information from the Charlottetown Airport Authority, Tourism PEI, and the Sabre database was used.

3) For the bridge and ferry, number of vehicles was used and each vehicle is considered a travel party. To convert the number of travel parties on the bridge and ferry to visitors, the average party size at both exit points was used. Data on average party size per month was derived from the 2014 exit survey.

## 2.3. Estimated Number of Travel Parties

Note: Result was based on total overnight pleasure stays (nights) in PEI regions (Total N = 1,716,832).

## 4. TOTAL DIRECT TOURISM EXPENDITURES BY OVERNIGHT PLEASURE VISITORS

- Total direct expenditures by overnight pleasure visitors to PEI were over \$439.6 million.
- Those who visited during the main season of July and August accounted for 61.4 percent of total direct expenditures. Those who visited during the fall shoulder season of September and October accounted for 17.9 percent of total direct expenditures and those who visited during the spring shoulder season of May and June accounted for 11.8 percent of total direct expenditures.
- Overall, the categories that accounted for the largest proportion of total direct expenditures were accommodations (\$148.7 million; 33.8%), food and beverage at restaurants, bars, etc. (\$86.3 million; 19.6%), shopping (\$58.1 million; 13.2%), and vehicle operation (\$45.0 million; 10.2%).
- On average, overnight pleasure travellers spent \$1,213.87 per party per visit and \$83.51 per person per night. Average spending was highest by those who visited during the main, fall and spring seasons.
- The survey instrument used for the study did not permit the calculation of actual spending that occurred in each region of PEI. As a result, a regional distribution of total direct tourism expenditures was estimated using the proportion of total nights spent in each tourism region. The calculation was as follows: (number of nights spent in tourism region/total nights spent in PEI by all overnight pleasure visitors) x total direct tourism expenditures.
  - Based on this method, it is estimated that 40.5 percent of total direct tourism expenditures were spent in the Green Gables Shore region (\$178.0 million). This region accounted for the greatest proportion of total expenditures.
  - The regions with the next largest proportion of direct expenditures were the Greater Charlottetown Area (\$127.8 million; 29.0%), Points East Coastal Drive (\$51.9 million; 11.8%) and Summerside (\$34.7 million; 7.9%).
  - Spending in the Red Sands Shore region totalled \$24.9 million (5.7% of total expenditures) and spending in **the North Cape Coastal Drive region totalled \$22.5 million (5.1% of total expenditures).**
- In total, 31,547 overnight pleasure travel parties contributed to the spending in the North Cape Coastal Drive region. The categories that accounted for the greatest proportion of expenditures in in the North Cape Coastal Drive region were accommodations (\$6.2 million; 27.6%), food and beverage at restaurants, bars, etc. (\$4.9 million; 21.6%), vehicle operation (\$3.3 million; 14.5%), shopping (\$2.7 million; 11.8%), and food and beverage at stores (\$2.6 million; 11.4%).

## **APPENDIX: 2014 EXIT SURVEY METHODOLOGY**

### **A.1. Sampling Procedure**

#### **Target Population**

- Mail-back questionnaires were distributed to non-resident visitors to Prince Edward Island in 2014 as they exited PEI via the Charlottetown Airport, the Confederation Bridge connecting PEI to New Brunswick, or the Northumberland Ferries Limited ferry service between PEI and Nova Scotia.
- The target population did not include cruise ship passengers and crew, motor coach tourists, refugees, landed immigrants, and military Canadian residents.

#### **Mail-back Questionnaires**

- The mail-back questionnaires were distributed at the three exit points during the period from December 31<sup>st</sup>, 2013 to January 7<sup>th</sup>, 2015.
- At the Charlottetown Airport, a representative of the Centre for Tourism Research (CTR) approached departing travellers and asked them if they had been visiting PEI or if they were a current resident. If they had been visiting PEI, the CTR representative explained the research study and asked the individual if he/she would be willing to participate. If he/she agreed to participate, the individual was provided with a package containing the mail-back questionnaire.
- At the toll booths at the Confederation Bridge in Borden-Carleton and Northumberland Ferries Limited in Wood Islands, employees of Strait Crossing Bridge Limited and Northumberland Ferries Limited handed the mail-back questionnaire package to drivers of non-PEI vehicles (based on their motor vehicle inspection sticker) as they paid to exit the province. The Centre for Tourism Research provided a distribution schedule to staff of Strait Crossing Bridge Limited and Northumberland Ferries Limited that showed the number of questionnaires to distribute on select days of the month.
- Responding to the survey was voluntary.

## Online Survey

- The mail-back questionnaire package included a web address for the online version of the survey. Individuals who received the questionnaire packages had the option of completing the hard-copy questionnaire or the online version. The online version of the survey was available in six languages: English, French, traditional and simplified Chinese, Japanese and German while the paper copy was available in English and French only.
- In addition, specific individuals were invited to participate in the online exit survey. An email invitation to complete the online exit survey was distributed to two groups of individuals:
  - Non-residents who had signed up to participate in tourism research at visitor information centres across PEI in 2014. The email addresses collected through this method were provided to the CTR regularly so that the email invitation to the survey could be sent on a timely basis.
  - Non-residents who had provided their email address (and agreed to be contacted) when they requested the official PEI Visitor's Guide or other publications from Tourism PEI, signed up for Tourism PEI's eNewsletter, or entered a contest sponsored by Tourism PEI. The sample included individuals who had made such requests between November 2013 and October 2014. In November 2014, the CTR sent these individuals an email that included a link to a survey that asked about their intention to visit PEI when they requested a publication or entered a contest. They were also asked if they had visited PEI in 2014 for a pleasure trip of one or more nights. If so, they received the questions from the 2014 PEI visitor exit survey.

## A.2. Samples

### Samples Collected and Used

- In total, 7,451 surveys were collected. About 32 percent were mail-back surveys and the remainder was online surveys. The online survey includes those who received the questionnaire package and chose to complete the survey online, and those who were specifically invited to participate in the online survey as described in Section A.1.
- As previously mentioned, in addition to the direct method of soliciting participation in the exit survey, those who had contacted Tourism PEI to request a publication or eNewsletter or had participated in a contest sponsored by Tourism PEI were invited to participate in the exit survey if they had visited PEI in 2014 for a pleasure trip of one or more nights. A total of 4,791 surveys were collected from this method.
- In total, 5,824 surveys were used in the 2014 PEI exit survey study. About 40 percent of the used surveys were mail-back surveys and 59.6 percent were online surveys.

**Table A-1: Samples Collected and Used**

	Surveys Collected		Surveys Used		Use Rate
	N	%	N	%	%
Mail-back Survey	2,374	31.9%	2,353	40.4%	99.1%
Online Survey	5,077	68.1%	3,471	59.6%	68.4%
Total	7,451	100.0%	5,824	100.0%	78.2%

- As shown in Table A-2, 43.7 percent of the surveys used in the study were completed by non-residents who had visited PEI during the main season of July and August. About 21 percent were completed by non-residents who had visited PEI during the fall shoulder season of September and October, and 16.7 percent were completed by those who had visited PEI during the spring shoulder season of May and June. The remainder (18.6%) was completed by those who had visited PEI during the winter off-seasons of January to April and November to December.

- The majority of surveys were completed by non-residents who exited PEI via the Confederation Bridge (58.2%). The proportion of samples from the other two exit points was similar at about 21 percent each.
- Surveys completed by residents of Ontario accounted for the largest proportion of the sample at 26.2 percent, followed by residents of Nova Scotia (16.9%), Quebec (11.2%) and New Brunswick (10.1%). About 17 percent of the surveys were completed by residents of the United States and 4.1 percent of the surveys were completed by residents of a country other than Canada or the United States.

**Table A-2: Samples Used by Exit Point, Origin, and Tourism Season**

	Jan-Apr Winter Off-Season		May-Jun Spring Shoulder		Jul-Aug Main Season		Sep-Oct Fall Shoulder		Nov-Dec Winter Off-Season		Total Full Year

## Sample Size and Margin of Error

- The approximate margin of error associated with the total sample and specific sub-groups (tourism season) used in this report is shown in Table A-3.
- In terms of statistical accuracy, the actual margin of error for each market will vary slightly due to minor variations in the sample size.
- Overall, a sample of this size has a sampling error of  $\pm 1.28$  percent at a 95 percent confidence level, though the margins of error for the five sub-groups are higher (January-April winter off-season =  $\pm 3.69\%$ ; May-June spring shoulder season =  $\pm 3.12\%$ ; July-August main season =  $\pm 1.93\%$ ; September-October fall shoulder season =  $\pm 2.78\%$ ; November-December winter off-season =  $\pm 4.98\%$ ).
- The sample can also be divided into same-day and overnight visitors. Due to the smaller sample size, the margin of error for the sub-group of same-day visitors is  $\pm 5.74\%$ .
- The margin of error for overnight visitors is slightly higher than the overall sampling error at  $\pm 1.31\%$ .
- Note that this is a guideline only. The same caution should be applied when interpreting significance testing throughout this report.

**Table A-3: Sample Size and Margin of Error**

	Same-Day		Overnight		Total	
	Sample Size	Margin of Error <sup>a)</sup>	Sample Size	Margin of Error <sup>a)</sup>	Sample Size	Margin of Error <sup>a)</sup>
Jan-Apr Winter Off-Season	52	$\pm 13.50$	644	$\pm 3.84$	696	$\pm 3.69$
May-Jun Spring Shoulder Season	31	$\pm 17.55$	942	$\pm 3.17$	973	$\pm 3.12$
Jul-Aug Main Season	103	$\pm 9.61$	2,443	$\pm 1.97$	2,546	$\pm 1.93$
Sep-Oct Fall Shoulder Season	58	$\pm 12.81$	1,168	$\pm 2.84$	1,226	$\pm 2.78$
Nov-Dec Winter Off-Season	45	$\pm 14.51$	338	$\pm 5.30$	383	$\pm 4.98$
<b>Total Full Year</b>	<b>289</b>	<b><math>\pm 5.74</math></b>	<b>5,535</b>	<b><math>\pm 1.31</math></b>	<b>5,824</b>	<b><math>\pm 1.28</math></b>

Note: <sup>a)</sup> Margin of error indicates % of total number of parties used in each sub-group at the 95% confidence level.

## Sample Size for the NCCD Regional Visitor Profiles

- As shown in Table A-4, 54.5 percent of the surveys used for this report were completed by non-residents who had visited PEI and stayed overnight in the North Cape Coastal Drive (NCCD) region during the main season of July and August. About 23.6 percent were completed by non-residents who had visited PEI and stayed overnight in the NCCD region during the fall shoulder season of September and October, and 9.2 percent were completed by those who had visited PEI and stayed overnight in the NCCD region during the spring shoulder season of May and June. The remainder (12.7%) was completed by those who had visited PEI and stayed overnight in the NCCD region during the winter off-seasons of January to April and November to December.
- Overall, a sample of this size has a sampling error of  $\pm 4.68$  percent at a 95 percent confidence level.
- Note that numbers in red in Table A-4 indicate 'caution' due to small base sample size and this is a guideline only. The same caution should be applied when interpreting significance testing throughout this report.

**Table A-4: Samples used for This Report and Margin of Error**

Tourism Season	Sample Size <i>N</i>	%	Margin of Error
Jan-Apr Winter Off-Season	38	8.8%	$\pm 15.84$
May-Jun Spring Shoulder Season	40	9.2%	$\pm 15.39$
Jul-Aug Main Season	236	54.5%	$\pm 6.33$
Sep-Oct Fall Shoulder Season	102	23.6%	$\pm 9.63$
Nov-Dec Winter Off-Season	17	3.9%	$\pm 23.65$
<b>Total</b>	<b>433</b>	<b>100.0%</b>	<b><math>\pm 4.68</math></b>

Note: Number of samples used for this report includes only those who stayed at least one night in the North Cape Coastal Drive (NCCD) region but excludes those who visited NCCD for business purpose trips. Thus, samples in this report include those who stayed overnight in other PEI regions; **Number in red indicate 'caution' due to small base sample size;** <sup>a)</sup> Margin of error indicates % of total number of parties used in each sub-group at the 95% confidence level.

## **A.3. Data Processing and Weighting**

### **Data Processing and Error Detection**

- The PEI exit survey study involved many steps of data processing.
- All mail-back questionnaires were manually reviewed to determine if they were complete and coherent.
- Data were then captured, coded and verified, and then merged with online survey data.
- Electronic verifications were also made to identify any outliers and to correct them.
- Statistical reliability and validity tests, and consistency controls were also conducted during this process.

### **Data Imputation**

- In the PEI exit survey, some data were imputed. For example, missing travel party size, total nights stayed in PEI (length of stay), and/or total trip spending were imputed if the remainder of the fields on the questionnaire was valid.
- The target populations were partitioned into: same-day and overnight visitor parties; three exit points; 12 months (based on departure date) and five tourism seasons (January-April winter off-season, May-June spring shoulder season, July-August summer main season, September-October fall shoulder season, and November-December winter off-season); and nine origins of visitors, including New Brunswick, Nova Scotia, Newfoundland and Labrador, Quebec, Ontario, Rest of Canada, New England, Rest of US, and International visitors.
- Total imputation was carried out for all the factors above and for strata that were outside the scope of the questionnaire distribution.
- For these out-of-scope factors, the characteristics of visitors were estimated using the 2012 PEI exit survey and 2014 Tourism PEI conversion study data.
- Total imputation was also performed for any in-scope factors that received an insufficient number of surveys for some specific segments (i.e., same-day visitors) to meet minimum requirements (combination of minimum number of questionnaires and maximum weight) based on the exit point traffic counts.

## Bias Adjustment and Weighting the Sample

- For estimation purposes, the responses obtained through the questionnaires must be treated as a simple random sample from the total traffic in each stratum (three exit points by same-day and overnight visitors, by origin and by month).
- The data may be subject to some degree of “*distribution bias*” due to the fact that not all categories of visitors are represented in the distribution or to a “*non-response bias*” due to the fact that the individuals replying may not be representative of the visitor population.
- Weighting techniques used in the estimation process attempt to reduce the effect of biases and were also performed to determine aggregate visitor parties’ characteristics. Therefore, using the calculated weights, estimates can be obtained for a variety of trip and visitor characteristics. These estimates take the form of totals, averages and percentages, and can be obtained at different levels.
- For this report, the final survey sample was weighted by same-day and overnight visitor parties, three exit points, five tourism seasons, and origin of visitor parties to align it with the total PEI visitor parties in each market based on traffic data collected through the three exit points.
- Weighting values were calculated by using a mix of traffic data provided by the Charlottetown Airport Authority, Strait Crossing Bridge Limited, Northumberland Ferries Limited, and the PEI Department of Economic Development and Tourism, and results obtained from the mail-back and online surveys.
- According to the traffic data and exit survey information, it was estimated that 432,832 non-resident parties visited PEI in 2014.
  - By Same-day and Overnight:  
Same-day = 30,076 visitor parties (6.9%) and Overnight = 402,756 (93.1%)
  - By Exit Point:  
Airport = 47,727 (11.0%); Bridge = 342,188 (79.1%); and Ferry = 42,917 (9.9%)
  - By Tourism Season:  
January-April winter off-season = 62,836 (14.5%); May-June spring shoulder season = 67,368 (15.6%);  
July-August main season = 188,569 (43.6%); September-October fall shoulder season = 77,798 (18.0%); and  
November-December winter off-season = 36,261 (8.4%)

- By Market:  
New Brunswick = 137,581 (31.8%); Nova Scotia = 137,931 (31.9%); Newfoundland and Labrador = 5,859 (1.4%); Quebec = 41,147 (9.5%); Ontario = 52,148 (12.0%); Rest of Canada = 17,569 (4.1%); New England = 10,132 (2.3%); Rest of US = 21,636 (5.0%); and International = 8,829 (2.0%)
- These figures were used to weight the survey data and adjust the survey results. Therefore, results in this report are based on the weighting values rather than on the raw scores of the sample.
- However, note that results may not reflect all actual responses of each party or individuals in the party because the application of the weighting scheme was based only on the number of parties by same-day and overnight visitation, three exit points, five tourism seasons, and nine origins of visitors, not based on all survey questions.

## **A.4. Survey Instrument**

- The PEI exit survey questionnaire gathers information on the travel habits of visitors travelling to Prince Edward Island. Below is a list of information available from the questionnaire:
  - Usual place of residence (country, province/state, city, postal code/zip code)
  - Date of entry and exit (day, month, year)
  - Entry and exit point
  - Rental car usage and location of rental car pick-up
  - Party size and party composition
  - Primary reason for trip
  - Activities participated in
  - Primary destination of the trip and trip duration
  - Overnight stays in PEI regions and type of accommodation used
  - PEI regions visited during the trip
  - Type of visitation, last trip to PEI, and number of times visited PEI
  - Primary features that attracted visitors to PEI
  - Travel expenditures
  - Ratings of travel services, instance of complaints, and future behavioural intentions
  - Demographic information
- For consistency, the 2014 PEI visitor exit survey was the same as the 2012 exit survey with the following exceptions.
  - The following questions were added in 2014:
    - Do you currently live in the same country in which you were born? Yes, No – if no, where were you born?
    - What is your mother tongue? English, French, Other (please specify)
  - The 2012 and 2014 exit surveys included a question that listed travel activities and asked the respondent to indicate which activities they or members of their travel party had participated in while in PEI. The list of travel activities was modified in 2014. Specifically, three activities were removed from the 2014 survey:
    - Going to a lobster dinner
    - Going to a bar/pub/nightclub

- Participating in other sports and/or outdoor activities
- Four activities were added:
- Sampling local culinary products (lobster, potatoes, mussels, oysters, wine, beer, etc.)
  - Taking part in an authentic PEI experience/hands-on learning activity (lobster fishing, clam digging, pottery, etc.)
  - Participating in water activities (kayaking, tuna fishing, etc.)
  - Using the Confederation Trail (cycling, walking, running, etc.)
- The 2012 and 2014 exit surveys included a question that asked respondents to select the primary feature that attracted them to PEI. One feature was added to the list in 2014:
    - Festivals and events
  - As noted previously, the 2014 exit survey included questions related to the celebrations that took place in PEI in 2014 to celebrate and commemorate the 150<sup>th</sup> anniversary of the 1864 Charlottetown Conference. The new questions included:
    - Did you hear about the PEI 2014 celebrations/events before travelling to PEI?
    - Did you partake in any PEI 2014 celebrations/events while in PEI?
      - If yes, which PEI 2014 event(s) did you partake in? (Please specify)
      - If yes, to what extent did attending PEI 2014 event(s) influence your decision to travel to PEI? That is, did it account for 0% of your decision, 100% of your decision, or some percentage in between?
  - The survey question that asked about travel party expenditures in PEI also included two items specifically related to the PEI 2014 celebrations:
    - Spending on food and beverage at PEI 2014 events (if attended PEI 2014 event)
    - Shopping expenditures at PEI 2014 events (if attended PEI 2014 event)
